Environment

Keyword	Official Definition	Easy Explanation
Marine Carbon	Techniques aimed at removing CO2 from the	Removing carbon dioxide
Dioxide Removal	atmosphere and storing it in marine environments.	from the air and storing it in
(mCDR)		the ocean.
Ocean Alkalinity	A method of increasing the alkalinity of ocean water	Making ocean water more
Enhancement	to enhance its capacity to absorb atmospheric carbon	alkaline to help it absorb
(OAE)	dioxide.	more CO2 from the air.
Persistent Organic	Chemical substances that persist in the environment,	Dangerous chemicals that
Pollutants (POPs)	bioaccumulate through the food web, and pose a risk	don't break down and can
	to human health and the environment.	accumulate in living things.
Land Degradation	A state whereby the amount and quality of land	Keeping the amount and
Neutrality	resources necessary to support ecosystem functions	quality of land stable over
	and services remain stable or increase within	time.
	specified temporal and spatial scales and	
	ecosystems.	
Plastic Production	Regulatory limits set on the amount of plastic that can	Limits on how much plastic
Сар	be produced to reduce environmental impact.	can be made to protect the
		environment.

Lake-Effect Snow	Snow falling on the leeward side of a lake, generated	Snow caused by cold air
	by cold dry air passing over warmer water, especially	moving over warm lake
	in the Great Lakes region.	water.
Carbon Budget	The amount of carbon dioxide emissions permitted	The limit on CO2 emissions
	over a period of time to keep within a certain	to avoid excessive global
	temperature threshold.	warming.
Net-Zero Emissions	Achieving a balance between the greenhouse gases	Balancing the amount of
	put into the atmosphere and those taken out.	greenhouse gases emitted
		and removed from the
		atmosphere.
Cyclone Stagnation	The phenomenon where a cyclone remains in one	When a cyclone doesn't
Effects	area longer than usual, often leading to increased	move on quickly, causing
	and prolonged impacts.	extended damage.
Single-Use Plastics	Plastic products designed to be disposed of right after	Plastics that are thrown away
	use without being reused or recycled.	after one use.
Extended Producer	A policy approach where producers are given a	Making producers
Responsibility	significant responsibility—financial and/or physical—	responsible for their products
(EPR)	for the treatment or disposal of post-consumer	from creation to disposal.
	products.	
Marine Carbon	Techniques aimed at removing carbon dioxide	Methods to take out CO2
Dioxide Removal	directly from seawater to mitigate climate change.	from the ocean to fight
		climate change.
Lake-Effect Snow	Snowfall caused when cold dry air passes over	Snow that forms when cold
	warmer water bodies, particularly large lakes, gaining	air moves over warm lake
	moisture and heat.	water.
Albedo Effect	The fraction of solar energy reflected from the Earth	How much sunlight Earth's
	back into space, influencing the Earth's climate.	surface reflects back into
		space.
Ice-Free Arctic Day	A day on which there is no sea ice present in the	A day when the Arctic Ocean
	Arctic Ocean during the summer melt season.	has no ice.
Land Degradation	A state whereby the amount and quality of land	Maintaining or improving the
Neutrality	resources necessary to support ecosystem functions	quality and quantity of land
		aver time
	remain stable or increase over time.	over time.
Arctic Amplification	The phenomenon that the Arctic region is warming	The Arctic warming up much
Arctic Amplification		
Arctic Amplification	The phenomenon that the Arctic region is warming	The Arctic warming up much
Arctic Amplification	The phenomenon that the Arctic region is warming	The Arctic warming up much faster than other parts of the
	The phenomenon that the Arctic region is warming faster than the rest of the world.	The Arctic warming up much faster than other parts of the world.
Climate Tipping	The phenomenon that the Arctic region is warming faster than the rest of the world. Critical points within the climate system that, when	The Arctic warming up much faster than other parts of the world. Points at which small

La Niña	A climate pattern that describes the cooling of sea	Cooling of the Pacific Ocean
	surface waters in the Pacific Ocean, which can	that affects global weather
	significantly impact global weather.	patterns.
El Niño Southern	A climate cycle in the Pacific Ocean with a global	Climate changes in the
Oscillation (ENSO)	impact on weather patterns, involving shifts between	Pacific that affect weather
	El Niño and La Niña.	around the world.
Planetary Boundary	The part of the atmosphere directly influenced by the	The atmosphere layer that
Layer Height	earth's surface and responds to changes in surface	reacts directly to changes on
(PBLH)	forcings.	Earth's surface.
Cold Weather	Chemical processes that occur in the atmosphere at	Chemical reactions in the air
Chemistry	lower temperatures, affecting air quality and climate.	during cold weather affecting
		climate.
Secondary	Tiny particles formed in the atmosphere from gas	Particles formed from gases
Aerosols	molecules, significant for air quality and climate.	in the air that impact climate
		and air quality.
Greenwashing	Corporate or governmental initiatives that claim to	Policies that pretend to help
Policies	prioritize environmental concerns but are actually	the environment but are not
	superficial or misleading.	effective.
Compensatory	Planting of trees to compensate for the loss of forest	Planting new trees where
Afforestation	area due to industrial projects.	others were cut down for
		development.
Subduction Zones	Areas of the Earth's crust where one tectonic plate	Places where Earth's plates
•	moves under another, often causing earthquakes and	meet and one slides beneath
	volcanic activity.	another, causing natural
		disasters.
Carbon	The process of capturing and storing atmospheric	Storing carbon from the
Sequestration	carbon dioxide to mitigate global warming.	atmosphere to slow down
-		climate change.
Hyperlocal	Small-scale environments uniquely adapted to	Very small, area-specific
Ecosystems	specific areas, often influenced by human activities.	environments influenced by
		nearby human activities.
Glacial Lake	Sudden releases of water from glacial lakes, which	Dangerous floods caused by
Outburst Floods	can cause catastrophic flooding.	water suddenly released from
(GLOFs)		glacier lakes.
Tsunamigenic	Earthquakes that occur underwater and are capable	Underwater earthquakes that
Earthquakes	of generating tsunamis.	can cause tsunamis.

Science and Technology

Keyword	Official Definition	Easy Explanation
Extrachromosomal DNA	DNA that exists outside the chromosomes	DNA pieces outside normal
(ecDNA)	and can replicate independently, often	genes that can influence cancer.
	affecting cancer and tumor growth.	
Frontier Al Risks	The potential dangers associated with	The risks of developing very
	advanced artificial intelligence, including	advanced AI technologies.
	ethical and safety concerns.	
Biologized Inheritance	The concept of passing on traits or conditions	How traits can be inherited
g	not only through genes but also through	through both genes and one's
	environmental and social factors.	environment.
Genetically Modified	Parasites that have been genetically	Parasites altered in the lab to
Parasites	engineered to study diseases or for potential	help in research or disease
T ardshes	use in disease control strategies.	control.
Late-Arresting vs. Early-	Classification of parasites based on the	Parasites categorized by when
	•	o ,
Arresting Parasites	timing of their impact on their hosts during	they affect their hosts.
	the host's lifecycle.	
Extrachromosomal DNA	DNA that exists outside of chromosomes and	DNA outside normal
(ecDNA)	can replicate independently, often playing a	chromosomes that can
	role in cancer progression.	contribute to cancer.
Quantum Dot Solar Cells	Solar cells that utilize quantum dots to	Solar cells enhanced by tiny
<u> </u>	improve light absorption and overall	particles for better sunlight
	efficiency.	capture.
Gravitational Lensing	The bending of light by gravity from a	Using gravity's effect on light to
	massive object, used in astronomy to study	view distant objects in space.
	distant celestial objects.	
James Webb Space	The largest space telescope designed to	A major space telescope for
Telescope (JWST)	provide improved infrared resolution and	observing the universe in
	sensitivity over the Hubble Telescope.	infrared light.
Hubble Tension	The discrepancy in measurements of the rate	Conflicting data on how fast the
	at which the universe is expanding.	universe is growing.
Ghost Guns	Firearms that are made by individuals using	Guns made at home that can't
	parts that do not have serial numbers and	be tracked because they lack
	are therefore untraceable.	serial numbers.
Biodegradable Satellites	Satellites designed to decompose naturally	Satellites that break down after
	after their mission ends to reduce space	use to avoid cluttering space.
	debris.	
Space Traffic	The management of space vehicles and	Managing satellites and debris to
	debris in Earth's orbit to prevent collisions	keep space travel safe.
	and maintain safe navigation.

		5
Genetic Bottleneck	A sharp reduction in the size of a population,	When a population drastically
	leading to a decrease in genetic diversity.	decreases, leading to less
		genetic variety.
Astropolitics	The study of the political and legal	Politics concerning space
	implications of human activities in outer	exploration and usage.
	space.	
Sakharov Conditions	Necessary theoretical conditions for	Conditions needed for the
	explaining the matter-antimatter asymmetry	difference in matter and
	in the universe.	antimatter in the universe.
Microglia Overactivation	The excessive activation of microglia, brain	When brain immune cells
	immune cells, which can lead to	become overactive and cause
	neuroinflammation and neurological	brain issues.
	diseases.	
Electrification Paradox	The observed phenomenon where increases	Using more energy because of
	in energy efficiency lead to higher overall	more efficient technology.
	energy consumption, instead of reducing it.	
Cross-Species	The transfer of diseases or pathogens from	Diseases that move between
Transmission	one species to another, often highlighting	different animal species or to
	zoonotic diseases.	humans.
Lentivirus Vector	A type of virus used in gene therapy to	A virus used to carry new genes
• •	deliver genetic material into the DNA of cells.	into cells in gene therapy.
Furin Cleavage Site	A specific sequence in a protein that allows	A spot on a protein where it gets
	for the protein to be cut and activated by the	cut to be turned on.
	enzyme furin.	
Technosignatures	Observable properties or effects that provide	Signs that could show
	evidence of advanced technology used by	technology from aliens.
	extraterrestrial civilizations.	
Bioequivalence	A measure used in pharmacology to assess	Comparing two drugs to see if
	if two drugs have similar bioavailability and	they work the same in the body.
	activity in the body.	
Gene Therapy	A medical field focused on the modification of	Changing genes in cells to treat
	genetic material within a patient's cells to	or prevent diseases.
	treat or prevent disease.	
Quantum Key	A secure communication method that uses	Sending secure messages using
Distribution (QKD)	quantum mechanics to distribute	the principles of quantum
	cryptographic keys.	physics.
Post-Quantum	Cryptography designed to be secure against	Encryption methods safe from
Cryptography	the computational power of future quantum	future quantum computers.
	computers.	
Blood-Brain Barrier	The barrier in the central nervous system that	A natural barrier preventing
	prevents certain substances in the blood	harmful substances in the blood
	from entering the brain.	from reaching the brain.

Polyamines	Organic compounds that regulate cell growth	Natural substances in cells that
	and function.	help regulate growth and health.
Slow-Slip Tectonic	Faults that release accumulated stress slowly	Faults that move slowly without
Faults	over time without causing significant	causing large earthquakes.
	earthquakes.	
Decoherence	The process by which quantum systems lose	When quantum systems interact
	their quantum properties through interaction	with the environment and lose
	with their environments.	unique properties.
Air-Independent	A submarine propulsion technology that	Submarine technology that
Propulsion (AIP)	allows submarines to operate without the	works without surface air.
	need for atmospheric oxygen.	
Bioequivalence	A pharmacological term indicating that two	Two drugs that work the same
	drugs release their active ingredient into the	way and are equally effective.
	bloodstream at the same rate and extent.	
Critical Minerals	Reliance on essential but often scarce	Dependence on rare minerals
Dependency	minerals critical for modern technologies.	crucial for modern technology.
Genetic Profiling	Analyzing DNA to identify genetic differences	Using DNA to find genetic
	that may determine disease risk or personal	information that can predict
	traits.	health and personal
		characteristics.
Technosignatures	Evidence of advanced technology or its use	Signs that suggest the presence
	by extraterrestrial sources.	of advanced alien technologies.
Neurotropism	The affinity of pathogens or treatments to	The tendency of certain diseases
	target nerve cells.	or treatments to affect nerve
		cells.
Synthetic Biology	The redesign of biological components and	Engineering new biological parts,
	systems that do not already exist in the	devices, or organisms.
	natural world.	
Genetic Circuitry	Engineered networks of genes that mimic	Designed gene networks that
	electronic circuits and are used to program	control how cells behave.
	cell behaviors.	
Digital Twin Technology	Virtual replicas of physical devices used to	Creating digital versions of real-
Digital Twin Technology	Virtual replicas of physical devices used to run simulations before actual devices are	Creating digital versions of real- world devices for testing and
